Welch, Francis X.:
In the Nation's Capital: Wage-hour administrator issues order calling for 40-cent minimum wage in telephone industry; "Dream articles" in newspapers predicting person-to-person radio communication in near future mislead public; Wartime restrictions on Great Lakes communications canceled, July 1, p. 13; WMC inaugurates job control program which may help telephone industry; Wage-Hour administration liberalizes "learner" period regulation for operators; Taxi-cabs ready to use two-way communications; Suit on hotel surcharges opened at New York City, July 8, p. 17; Detroit Edison case doctrine spreading in leaps and bounds; Several state commissions investigating utility war taxes with view of reducing rates to eliminate levies; Democrats worry over answer to FCC plank in Republican platform; Interesting facts about Dewey, July 15, p. 13. Two developments of international flavor having indirect effect on communication industries discussed; One has to do with elimination of restrictions on free exchange of views and information between countries; The other is in regard to monetary conference at Bretton Woods, July 22, p. 18. WPB order discussed; Predicts manufacture of civilian telephones will be increased third quarter of present calendar year and in 1945; WPB four-point conversion program for manufacturers revealed; July 29, p. 11.
OPA power in utility rate case reaches new low; District of Columbia commission refuses to allow federal agency to make appearance in case involving reduction of streetcar fares; WPB Telephone Operations Industry Advisory Committee makes recommendations to OWI; Commissioner Jett studies international communications, Aug. 5, p. 14. Subscriber requests Mr. Welch to prepare suggested form of announcement for telephone companies to make to employes recommending behavior during presidential election; WPB revises U-3 order; Philadelphia transit strike discussed in light of recent FEPC order, Aug. 12, p. 21. Meeting held on international communications; Train radio-telephone experiments discussed by Mr. Welch; IRAC suggests elimination of short-wave international broadcasting; Radio regulation problem explained, Aug. 19, p. 16. Michigan commission directs Detroit Edison to rebate $10,450,000 to its customers for 1944 in connection with Michigan Supreme Court's decision on utility excess profits tax payments; California commission investigating problem of disallowing war profits in utility earnings, Aug. 26, p. 24.
Appointment of Krug and "shake-up" in WPB discussed; FCC committee will confer with Western Union representatives on telegraph rate revision; Judge J. E. Benton resigns from NARUC; Senate and House pass respective versions of legislation on disposal of surplus war goods, Sept. 2, p. 15. Ruml's plan to reduce corporation taxes discussed; New York radical's charge that telephone industry fosters veterans' telephone fund answered; Manufacturers to have part in distribution of government's surplus communications equipment; Await passage of Surplus Goods Act, Sept. 9, p. 13. Krug pronouncement that civilian production will be on bigger scale after Germany surrenders stirs up speculation; FCC loses and wins in court cases; Fly again before House investigating committee; His resignation likely, Sept. 16, p. 13. House committee investigating FCC adjourns hearings; More agitation for rewriting Communications Act; Legislation likely on merger of American communications interests; Testimony of Chairman Fly discussed, Sept. 23, p. 13.
Current FCC radio allocation hearings would seem to indicate that Chairman Fly favors radio and telephone groups in reserving frequencies, and that the telephone industry "walked into these proceedings facing a pretty well stacked deck of cards," Oct. 14, p. 16. FCC Commissioner Durr's and Lowell Mellett's statements concerning the lack of telephone service to the farmers reviewed; "Eligibles" for FCC vacancies listed; Suggested appointments being held up to take care of some election casualties, Oct. 21, p. 90. Rural telephone situation is primarily a small company problem; Industry cooperation needed in solving it; Mr. Welch warns against permitting REA to enter field as present trend of that agency shows it may not stop at serving farmers but may move into urban territories,* Oct. 28, p. 12.
Muzak Corp. requests frequencies for broadcast of "adless" radio programs in FCC allocation hearings; Welch ventures prediction on outcome of election, both Presidential and Congressional, Nov. 4, p. 15. FCC has responsibility to see that allocation of radio frequencies, subject of current hearings, is made on a basis so the public will derive radio-telephone service by a substantial, well-established and regulated industry, such as the telephone industry, Nov. 11, p. 15. Mr. Welch gives his interpretation of election results and impression of political trends in next four years; Discusses recent television transmission over telephone wires and possibility of using radio to vote in election, Nov. 18, p. 16. Paul A. Porter, if nomination to FCC is approved by Senate, may become next commission chairman; FCC issues report attacking industry for decrease in rural telephone service, which, at certain points, Mr. Welch says, is unfair, fallacious and incomplete; The industry, he says, has a right to expect that responsible federal agencies should present such a matter fairly with all relevant facts in true perspective,* Nov. 25, p. 16.
Checks and balances theory of United States government, with regard to the Illinois Commercial Telephone Co. case before NWLB, would seem to be no longer effective as heretofore; Means for relief under such WLB decision listed; Mr. Welch also suggests amendment to labor board's appropriation bill, Dec. 9 p. 25. Politicians thinking up schemes to aid farmers in order to recapture their votes; Recent attempt by Agriculture Department and officials to use REA to gain farmers' votes example of what could happen to an RTA if not administered by competent and sincere officials; Such a bill might be of benefit to industry and farmers if administrators were interested solely in expanding telephone service to rural areas rather than turning it into a "political racket," Dec. 23, p. 14. Eight out of 10 predictions for 1944 made by Mr. Welch came true; He makes 10 prophecies regarding items of interest to the telephone industry for 1945; Review of major developments during past year, Dec. 30, p. 9.
